President's Message

Raffi Aghvinian

14th annual Cad/Cam symposium Nov 16-19

Ever feel digital dentistry is exploding and cannot keep up with all the new materials, products, machines. This is an excellent venue to see it all in the exhibit hall and hear expert speakers in the field.

<http://www.dloac.org/dloac-symposium>

Renewal of Tennyson Study Club dues \$210 made out to Tennyson Study Club. This includes your \$35 annual campus insurance fee which Bill Gould will pay to the school. Guests pay \$35 to cover the liability insurance fee for this meeting.

David Kim Solomon

"Simple to complex implant bar restorations - a subjective approach for optimal results".

There are over 450 implant manufacturers providing product to the US market, with more on the way. With all these systems, selecting an implant bar restoration can be challenging and it may leave you faced with few choices. What alternatives do you have for Doctor/Client expectations, cost and case predictability?

Understanding that each case is unique - this presentation will explore and provide the dental restorative team with ammunition for those discussions. A review of the latest cutting edge solutions along with the standard "tried and true" bar solutions will be presented. All-On-4 and beyond. Fixed, Removable, Hybrids. Learn what options and new materials are out there ready to go to work for you.

Following the presentation, a Q & A session with demo models will be presented with a "hands-on" review of the all new bar solutions offered from Panthera.

October 7th Tom Houle has arranged our next Speaker David Kim Solomon. Most milling centers are geared for high production and refuse any custom milling requests. Panthera is an extremely high quality custom milling center with attention to technician needs and requests they can solve most any patient problem. This is the perfect follow up to Domenico's lecture and shows how he partnered with Panthera to make the DiaMart bar. Ruth Burke, CDT a past removable speaker did the same with her R.E.Burke two piece bar.

DLOAC CAD/CAM Nov 16-19
Great Wolf Lodge Garden Grove
12681 Harbor Blvd, Garden Grove, CA 92840

Go to <http://www.dloac.org/dloac-symposium> to register. All 3 days \$125 or \$75 for 1 day. All Tennyson Study Club members need to put the code Tennyson Study to get the reduced price of \$125 instead of the \$250 at the door price. You must register by October 15th to take advantage of the reduced rate.

Our thanks to Domenico Cascione for his outstanding lecture!
